THE INSTITUTE

IIHMR is a premier institution dedicated towards transforming healthcare through research, training and education. IIHMR runs a full-time two-year Postgraduate Diploma in Hospital and Public Health Management enabling human resource professionals to make noteworthy contributions towards arena of healthcare globally. The institution is fully equipped with state of art facilities to take up Academic and Training programmes. It has an excellent combination of faculty with different backgrounds (Medical and non- medical) to take up Academics, Research and organize Management Development Programs in their respective specialties within and out of the campus. In this regard, IIHMR has been regularly engaged in organizing various Training / MDPs on Hospital Management, Public Health, Healthcare Management and Administration and Information Technology. As per the expertise available with the IIHMR, it can take up any of the customized trainings required by respective institutions depending on their training needs.

In the recent past hospital management training programmes have been organized for Government of National Capital Territory, Delhi, Ministry of Health – Afghanistan, BRAC- Bangladesh, Ministry of Health- Sri Lanka, Ministry of Health and Sports, Myanmar, Ministry of Health and Welfare- Bhutan, Jigme Dorji Wangchuck National Referral Hospital- Bhutan and Ministry of Health- Maldives etc.

MDP on Mental Health Management in the Community : August 16 - 20, 2021 (1:30 PM- 5: 30 PM)

Rationale

Mental health has come to forefront since the year 2017 when “Depression -Let’s talk” was declared as the theme of World Health Day. It is a neglected domain, especially due to the stigma attached to these disorders, which is still prevalent in most communities across the country. Almost 1 out of every 4 people in India are affected by some mental disorder at any point in time, and most of these are preventable. The COVID-19 pandemic has affected the mental health of millions of people across the world.. Management of mental disorders is not restricted to the hospitals but is also an integral part of communities, educational institutions, and workplaces.

Objectives

- To train participants in community mental health management
- To develop a framework for innovative and newer solutions to tackle mental health issues during the COVID 19 pandemic.

Benefits

Organizations will be benefited by:

Organizations will be able to develop a forte in the field of community mental health and apply the principles of mental health management in their respective industry.

Individuals will get benefitted by:

- Trained manpower for implementing solutions for mental health management in the community.
- Trained manpower for utilizing newer strategies to be applied in mental health issues during COVID 19 pandemic.

Course Outline

5-day program including theoretical sessions and ground level experiences from leaders in this domain from AIIMS, NIMHANS, PGI, MOHFW and other premier institutions

- Introduction to mental health and disease burden
- Mental health in adult (special consideration on pregnant women) and elderly population
