

SEHGAL, MEENA, Senior Fellow and Area Convenor, Environment and Health Area, Environment and Waste Management Division, The Energy and Resources Institute (TERI), India. She is an epidemiologist by training, and works on environmental issues which impact human health. She leads a team of research professionals working on assessing various environmental compartments for pollutants and health effects. Her areas of focus include climate sensitive health risks and emerging issues of effects of urban development on human health. She has been Principal Investigator for projects which have focussed on assessment of heavy metal in different environmental compartments, assessment of health effects from air pollutants at different work sites, and outdoor air. These projects have been funded by a variety of leading national and international organizations including Department of Science & Technology (DST), Indian Council of Medical Research (ICMR), Central Pollution Control Board (CPCB), Ministry of Health and Family Welfare (MOHFW), United Nations Children's Fund (UNICEF), World Health Organization (WHO), Norwegian Institute of Public Health (NIPH), Wellcome Trust, UK and Health Effects Institute (HEI), USA. Prior to her assignment at TERI, she had worked as Epidemiologist, Australian International Health Institute (AIHI), India and Centers for Disease Control and Prevention, Atlanta, USA. Her interests are primarily in designing environment and health studies for evidence building and policy recommendations. She has a Master's in Public Health, 1996 in International Health and Biostatistics from Rollins School of Public Health, Emory University, Atlanta, USA.
