

Training program on **Urban Health Planning and Management**

Second Batch of Two weeks “Training on Urban Health Planning and Management” is being organized at IIHMR Delhi from March 4- 15, 2019. 20 participants from Municipalities and Local Governments from Ministry of Health, Bangladesh are attending this training. The course objective relate to understand the challenges of urbanization, health needs and disease burden in urban area, policy support and bottlenecks to deal with them. Deliberations will be held on urban health strategies framed in Bangladesh to carry out urban health services and to get an in depth understanding of functioning of Local Self Government in urban areas along with innovative approaches and good practices to deliver urban services in different countries. Based on the above the participant will develop urban health plan in their respective areas.
