HOSPITAL AND HEALTH INSIGHT

Antibiotics & anti-diabetes drugs set to get cheaper
Some popular and commonly used antibiotics and anti-diabetes medicines are set to be cheaper by 10-35%. Drug price regulator, National Pharmaceutical Pricing Authority (NPPA), has slashed retail prices of 25 essential medicines, most of which are used in treatment of diabetes. Read more

Now, an app to find the closest blood bank
Moved by the plight of people who frantically search for blood donors and blood banks during medical emergencies, a Bengaluru-based software engineer has developed a mobile app that provides details of these facilities situated close by, from any location in the country.

Krishna Kant Tiwari has designed Android app Ausodhyatmika that lists the details of all registered blood banks of the country and their location, with contacts that can be accessed through Google Maps. Read more

AIIMS to launch 'adopt a patient' program
India's premier medical institute, AIIMS, visited by 8,000 to 10,000 patients daily, has decided to seek public donations for poor patients under an 'adopt a patient' policy. This, officials said, will fill the gap between demand and supply in donations for AIIMS patients. Read more

Smallest Pacemaker Implanted In 92-Year-Old At Medanta Hospital
The world's smallest pacemaker was successfully implanted in a 92-year-old man at Medanta Medicity Hospital in Gurgaon, one of the first hospitals in the country to offer such a heart device, said a doctor. Read more

WORLD AT GLANCE

First-of-its-kind multiple organ transplant in U.S.

In a first-of-its-kind procedure, doctors in the U.S. have successfully transplanted a “composite” skull and scalp flap, along with kidney and pancreas — all from the same donor — in a 55-year-old patient. The patient was suffering from a non-healing scalp defect and declining organ kidney and pancreas function, researchers said. Read more

**Mid-Day Meal Programme**

Tamil Nadu was the first to initiate a massive noon meal programme to children. Neither a child that is hungry, nor a child that is ill can be expected to learn. Realizing this need the Mid-Day Meal (MDM) Scheme was launched in primary schools during 1962-63. Mid-Day Meal improves three areas: 1. School attendance 2. Reduced dropouts 3. A beneficial impact on children’s nutrition.

The Central Government supplies the full requirement of food grains for the programme free of cost. For its implementation in rural areas, Panchayats and Nagarpalikas are also involved or setting up of necessary infrastructure for preparing cooked food. For this purpose NGOs, women’s group and parent-teacher councils can be utilized. The total charges for cooking, supervision and kitchen are eligible for assistance under Poverty Alleviation Programme. In several states, supplementary feeding was assisted by food supplies from Cooperation for American Relief Everywhere (CARE) and World Food Programme (WFP).
Objectives:

The objectives of the mid day meal scheme are:

1. Improving the nutritional status of children in classes I – VIII in Government, Local Body and Government aided schools, and EGS and AIE centres
2. Encouraging poor children, belonging to disadvantaged sections, to attend school more regularly and help them concentrate on classroom activities.
3. Providing nutritional support to children of primary stage in drought-affected areas
