

MANAGEMENT DEVELOPMENT PROGRAM

A TO Z IN HEALTH ECONOMICS (BASIC & ADVANCED)

BASIC: 10 - 13 OCT 2022

ADVANCED: 9 - 12 JAN 2023

ABOUT THE COURSE

Health Economics is concerned with the association between health status and the related resources assessing the value, behavior, efficiency and effectiveness of various stakeholders in the production and consumption of healthcare. The study of health economics is important in helping to ensure the efficient use of available resources, making health system more efficient and effective for maximising health benefits. It is also essential to improving health care delivery, outcomes, and lifestyle patterns through interactions with individuals and health care providers, in different clinical settings. Health Economics fits in every domain because what matters at end of the day for any setup is how much is the input (cost) and output (benefits measured in terms of money or other indicator).

Bringing together interdisciplinary research and teaching, IIMR Delhi is launching basic and advance training program on Health Economics which aims to provide participants with the knowledge and skills necessary to improve the health systems through the application of economic principles

OBJECTIVES OF THE COURSE

The objectives of the training program are:

- To orient the basic terms in health economic
- To learn steps in costing and conducting costing studies

BENEFIT OF THE COURSE

Organizations will be benefited by:

Having trained and skilled manpower who can apply principles of costing in every project they are part of

Individuals will get benefitted by:

Learning a super speciality skill in domain of public health in a world where there are very limited number of health economist.
