

# MANAGEMENT DEVELOPMENT PROGRAM ON MATERIALS AND EQUIPMENT MANAGEMENT FOR HEALTH INSTITUTIONS

October 14 – 16, 2019

Venue:

International Institute of Health Management Research, Delhi

## Rationale

Patient care depends on the availability of Materials. The main objective of healthcare institutions is to provide quality medical care within their existing resources. The role of material manager is to have the right materials at the right place and right cost. In the absence of appropriate supplies and functional equipments, the available manpower is rendered non functional and patient care takes a back seat. In fact, the role of availability of materials in patient satisfaction cannot be undermined. Further, the efficiency of a hospital partly consists in maximizing the quality of patient care per unit cost for which healthcare organization, materials and equipment supplies have an important role to play. With the fast changing technology and introduction of sophisticated equipments, there is an urgent need to acquire required skills to ensure timely supplies consistent with upgraded technology, proper maintenance and use of equipments.

In view of the above said, the course has been designed to train the participants for appropriate management of supply chain right from raw materials, processing, transportation, storage, distribution and inventory control. The acquisition of sophisticated equipments, their maintenance and issues related thereto shall be discussed

## Learning Objectives:

The learning objectives of the training are :

- To understand the concept and relevance of materials and equipment in providing patient care in healthcare organizations.
- Speedy flow of materials and equipment's with right quality, right quantity and at the right time
- Optimize the use of resource through scientific inventory control and proper maintenance of equipment
- Improved institutional image through good buyer/ seller relationship

## Benefits

### Organisation:

- Optimal use of resource and minimization of wastage of materials
- Enhanced patient satisfaction through availability of right materials and equipment

### Individual :

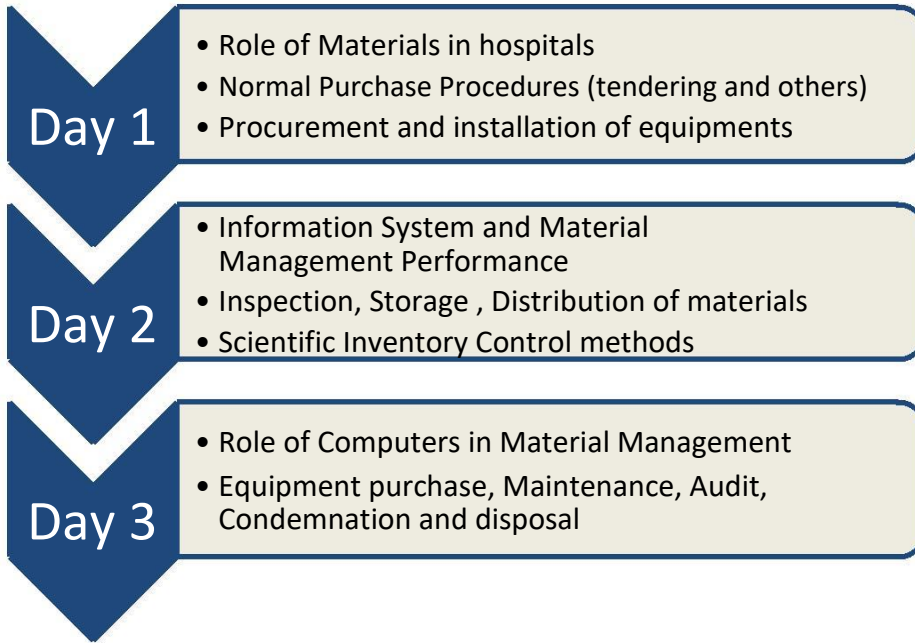

- Acquiring skills in appropriate methods for transportation, warehousing, procurement, distribution and maintenance of supplies and equipments
- Participants will be able to make use of proper inventory management techniques to avoid over supplies or stock out
- The knowledge acquired will be helpful in handling higher management responsibilities in future

## Target Audience

Healthcare professionals dealing with materials and equipment viz. Officers handling Supply chain management issues in Pharmaceuticals, Director of Health Institutions, Medical Superintendents, Deputy Medical Superintendents, Store officers, HODs of various clinical and diagnostic services, Hospital Administrators, Specialists and Senior Medical officers, Senior Nurses, Hospital technicians Chief /Head Pharmacist, Hospital consultants.
